T144H 2,700 lb

MAXIMUM LIFT 13.1 ft

POWER 24.8 hp **WIDTH** 55.3 in **TRANSMISSION** HYDROSTATIC

FEATURED EQUIPMENT

Spacious driver's cab for comfortable and safe handling. **Ergonomic joystick** that controls the movements of the panel, the hydraulic functions and the transmission. **Seat belt with a buckle sensor and seat with presence sensor** to prevent the machine from being used without following the minimum safety procedures. **Permanent 4WD** with automatic anti-slip system. **Hydrostatic transmission** to ensure smooth and safe operation for the user. **Slow approach pedal** for precise maneuvering.

TELEHANDLER

2,700 lb

The T144H is the smallest ultra-compact telescopic handler available on the market. At just 55 inches wide, it is the best solution for handling and transporting materials in confined spaces, especially in difficult-to-access areas with steep terrain. It can also easily be transported with a conventional trailer.

It has hydraulic functions and quick connect couplings for accessories and attachments, allowing it to be customized to suit each need. It is the perfect vehicle for landscaping work, greenhouses, agriculture and construction.

TELEHANDLERS

4,400 - 5,000 lb

AUSA's range of telescopic handlers with the highest payload. They are versatile machines whose payload allows them to handle larger materials. They are equipped with 4x4x4 drive, allowing them to cope with the most difficult terrains. They have three steering modes for improved maneuverability and approaches: front-wheel, four-wheel and crab.

They are designed to increase the driver's safety and comfort. The side position of the arm ensures a more spacious cab, while minimizing the overall cab width. The advanced cab position provides the operator with 360 degree vision.

FEATURED EQUIPMENT

Tilting cab for easy access to the engine and components. **Ergonomic joystick** that controls the movements of the panel, the hydraulic functions and the transmission. **Seat belt with a buckle sensor and seat with presence sensor** to prevent the machine from being used without following the minimum safety procedures. **Digital screen** to access machine information and on board diagnostics. **Limited-slip differential** on the front axle, which transmits the necessary amount of power to each individual wheel. **Three steering modes**: front-wheel, four-wheel and "crab mode". **Slow approach pedal** for precise maneuvering.

T204H 4,400 lb
MAXIMUM LIFT 13.8 ft
POWER 44.5 hp WIDTH 62.6 in TRANSMISSION HYDROSTATIC

T235H 5,000 lb
MAXIMUM LIFT 16.4 ft
POWER 44.5 hp WIDTH 62.6 in TRANSMISSION HYDROSTATIC

All AUSA telehandlers can be equipped with AUSAnow, the software used to remotely control machines, providing you with all real-time information.

Control your fleet of machines

From your office or with your mobile phone. Control all of your AUSA machines in real time. With AUSAnow you can anticipate any faults and maintenance, to reduce downtime.

Get information and make decisions

View or create your own personalized charts to obtain in-depth information about the operation of your machines and make decisions that are based on analytical information.

Connect security alarms

Establish a schedule and security perimeter. If one of your machines is moved outside the established area, AUSAnow will alert you straight away so that you can deal with it.

Data, data and more data

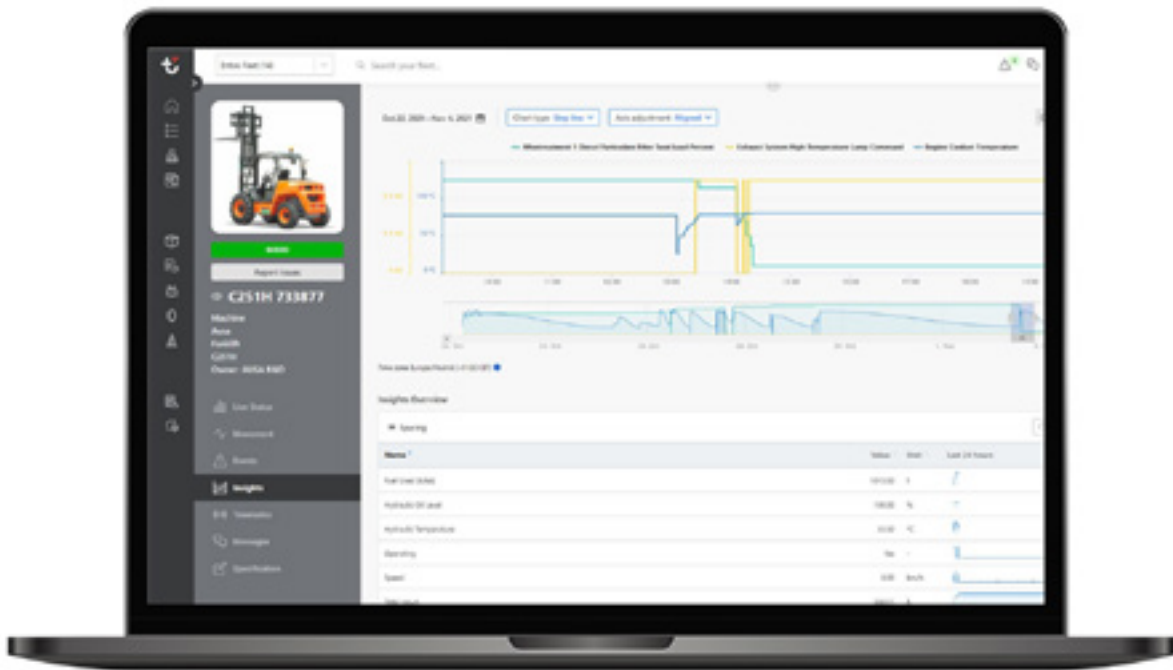

AUSAnow allows you to obtain advanced real-time information about your machine fleet. View advanced charts for customized time periods based on the parameters set by you.

Reduce downtime

AUSAnow connects you to your dealer or rental company, so that any appropriate maintenance can be performed. If you have a problem, AUSAnow provides you with a direct channel of communication with your machine vendor, so that it can be resolved as quickly as possible.

Preventive alerts
Attach images

Alarms for your peace of mind

Activate AUSA's recommended maintenance alerts and keep your machines in tip-top condition. And, for your security, you can program geofences and receive alerts if they go outside the established boundaries.

Customise a schedule
Set a perimeter
